Thank you Antonio. I appreciate your quick response – the information is very helpful. One additional piece of information I would like to know is who from TCEQ conducted the investigation at your facility?

Regards,

David Eppler

**Subject:** Potable Water Contamination

Hi David,

Finally got around to getting this out. Sorry for the delay.

I spoke to the employee at the lab who witness firsthand the change in water quality. He provided me the attached photo showing the water quality coming out of the sink facet.

Time line:

November 23<sup>rd</sup> .....observed change in water quality

January 11<sup>th</sup> .....TCEQ visited the facility to interview employees

I hope this is helpful. Let us know if you need anything else.

Regards,

**Antonio Martinez**
